

# Programs

- Looking for speakers who are involved in energy programs that can speak to interesting topics of value to our membership.
- Goal is book program speakers 3 months in advance.
- Always open to input from membership for speakers and topics.

# Programs

This year not all meetings will have traditional speakers. We may have some meetings that could be called “**Energy Technology Events**”. These events would focus on specific energy technologies of interest to our membership and would be *interactive* events with “hands on” learning opportunities.
